System Integration and Architecture

FULL REGRESSION REPORT

Project Title: BoduBodu - Bodyweight Exercise

Prepared By: Hisoler, Rhegynne Leighlane Monsanto

Report Version: 1.0

Date: 5/10/2026

1. Project Information

Project Name:	BoduBodu - Bodyweight Exercise
Course:	IT342 — System Integration and Architecture (G1)
Institution:	Cebu Institute of Technology — University
Prepared By:	Hisoler, Rhegynne Leighlane Monsanto
Report Date:	May 10, 2026
Repository Branch:	refactor/vertical-slice-architecture
Platforms:	Web (ReactJS), Backend (Spring Boot + Supabase), Mobile (Android Studio / Kotlin)

2. Refactoring Summary

The BoduBodu project underwent a structural refactoring to adopt Vertical Slice Architecture. This approach reorganizes the codebase by feature/module rather than by technical layers (controllers, services, repositories), resulting in improved modularity, cohesion, and maintainability.

2.1 Scope of Refactoring

Component	Refactored?	Approach
Web Frontend (ReactJS)	Yes	Reorganized by feature slices
Backend (Spring Boot)	Yes	Each feature module contains its own Entity, Controller, Service, Repository, and DTO
Mobile (Android/Kotlin)	No - As-is	Mobile retained its existing structure

2.2 Key Changes Made

- **Web Frontend:** Feature folders created: /features/auth, /features/exercise, /features/custom-workout, /features/workout-session, /features/history, /features/profile, /features/admin. Each slice contains its own components, hooks, and API calls.
- **Backend:** Spring Boot packages restructured per feature: edu.cit.hisoler.bodubodu.features.workouts, edu.cit.hisoler.bodubodu.features.exercises, edu.cit.hisoler.bodubodu.features.dashbaord, edu.cit.hisoler.bodubodu.features.auth, edu.cit.hisoler.bodubodu.features.user, edu.cit.hisoler.bodubodu.features.history
- **Shared/Common:** Shared utilities, DTOs, and security configurations retained in a common/shared layer accessible by all slices

3. Updated Project Structure

3.1 Web Frontend

4. Test Plan Documentation

The Software Test Plan was prepared separately and is included as an attachment [Software Test Plan](#) . The plan covers the following functional requirements:

Requirement ID	Functional Requirement	Acceptance Criteria Reference	Test Case ID
FR-01	User Registration	AC-1	TC-AUTH-001
FR-02	User Login	AC-2	TC-AUTH-002
FR-03	View Exercise Library	AC-3	TC-EX-001
FR-04	View Exercise Details	AC-3	TC-EX-002
FR-05	Create Custom Workout	AC-4	TC-CW-001
FR-06	Edit Custom Workout	AC-4	TC-CW-002
FR-07	Delete Custom Workout	AC-4	TC-CW-003
FR-08	Start Workout Session	AC-5	TC-WS-001
FR-09	Complete Workout Session	AC-5	TC-WS-002
FR-10	Workout History Viewing	AC-6	TC-WH-001
FR-11	View User Profile	AC-6	TC-PROF-001
FR-12	Admin Add Exercise	AC-7	TC-ADM-001
FR-13	Admin Edit Exercise	AC-7	TC-ADM-002
FR-14	Admin Delete Exercise	AC-7	TC-ADM-003
FR-15	Role-Based Access Control	AC-7	TC-SEC-001

5. Automated Test Evidence

Requirement ID	Functional Requirement	Acceptance Criteria Reference	Test Case ID	Status
FR-01	User Registration	AC-1	TC-AUTH-001	PASSED
FR-02	User Login	AC-2	TC-AUTH-002	PASSED
FR-03	View Exercise Library	AC-3	TC-EX-001	PASSED
FR-04	View Exercise Details	AC-3	TC-EX-002	PASSED
FR-05	Create Custom Workout	AC-4	TC-CW-001	PASSED
FR-06	Edit Custom Workout	AC-4	TC-CW-002	PASSED
FR-07	Delete Custom Workout	AC-4	TC-CW-003	PASSED
FR-08	Start Workout Session	AC-5	TC-WS-001	PASSED
FR-09	Complete Workout Session	AC-5	TC-WS-002	PARTIAL
FR-10	Workout History Viewing	AC-6	TC-WH-001	PARTIAL
FR-11	View User Profile	AC-6	TC-PROF-001	PASSED
FR-12	Admin Add Exercise	AC-7	TC-ADM-001	PASSED
FR-13	Admin Edit Exercise	AC-7	TC-ADM-002	PASSED

FR-14	Admin Delete Exercise	AC-7	TC-ADM-003	PASSED
FR-15	Role-Based Access Control	AC-7	TC-SEC-001	PASSED

6. Regression Test Results

Test Case ID	Functional Requirement	Status	Remarks
TC-AUTH-001	User Registration	PASSED	—
TC-AUTH-002	User Login	PASSED	—
TC-EX-001	View Exercise Library	PASSED	Video field empty — pending content
TC-EX-002	View Exercise Details	PASSED	—
TC-CW-001	Create Custom Workout	PASSED	—
TC-CW-002	Edit Custom Workout	PASSED	—
TC-CW-003	Delete Custom Workout	PASSED	—
TC-WS-001	Start Workout Session	PASSED	Video field empty — pending content
TC-WS-002	Complete Workout Session	PARTIAL	Incorrect date & category saved on completion
TC-WH-001	Workout History Viewing	PARTIAL	Some entries show incorrect dates/categories
TC-PROF-001	View User Profile	PASSED	—

TC-ADM-001	Admin Add Exercise	PASSED	—
TC-ADM-002	Admin Edit Exercise	PASSED	—
TC-ADM-003	Admin Delete Exercise	PASSED	—
TC-SEC-001	Role-Based Access Control	PASSED	—

7. Issues Found

Issue ID	Name	Severity	Module	Description
BUG-001	Incorrect Date on Workout Completion	Medium	Workout Session (Complete)	When a user finishes a workout, the completion date saved is wrong — it doesn't reflect the actual current date/time.
BUG-002	Incorrect Category on Workout Completion	Medium	Workout Session (Complete)	The workout category gets incorrectly assigned when finishing a session — it doesn't match the category set during workout creation.
BUG-003	Workout History Shows Wrong Data	Low	Workout History	History entries display wrong dates and categories — this is a downstream effect of BUG-001 and BUG-002.
BUG-004	Exercise Videos Not Yet Available	Low	Exercise Detail	Video fields exist in the UI but no video content has been linked yet — still finding appropriate videos.

8. Fixes Applied

Issue ID	Name	Fix Status	Fix Description
BUG-001	Incorrect Date on Workout Completion	IN PROGRESS	Need to fix the session completion handler to use server-side <code>LocalDateTime.now()</code> instead of relying on client-supplied values.
BUG-002	Incorrect Category on Workout Completion	IN PROGRESS	Need to fix the category mapping so it pulls from the original workout entity, not from request body data.
BUG-003	Workout History Shows Wrong Data	PENDING	Will be resolved automatically once BUG-001 and BUG-002 are fixed.
BUG-004	Exercise Videos Not Yet Available	PENDING	Video sourcing is ongoing. UI placeholders are already in place, will integrate once videos are finalized.
