### **SOFTWARE TEST PLAN**

---

Project Title: BoduBodu - Bodyweight Exercise

Prepared By: Hisoler, Rhegynne Leighlane Monsanto

Date: 5/9/2026

## Software Test Plan Scope

### BoduBodu – Bodyweight Exercise System

This Software Test Plan focuses only on:

- Functional Requirements Coverage
- Test Cases
- Test Scripts / Test Steps
- Automated Test Cases

#### 1. Functional Requirements Coverage Matrix

| Requirement ID | Functional Requirement   | Acceptance Criteria Reference | Test Case ID |
|----------------|--------------------------|-------------------------------|--------------|
| FR-01          | User Registration        | AC-1                          | TC-AUTH-001  |
| FR-02          | User Login               | AC-2                          | TC-AUTH-002  |
| FR-03          | View Exercise Library    | AC-3                          | TC-EX-001    |
| FR-04          | View Exercise Details    | AC-3                          | TC-EX-002    |
| FR-05          | Create Custom Workout    | AC-4                          | TC-CW-001    |
| FR-06          | Edit Custom Workout      | AC-4                          | TC-CW-002    |
| FR-07          | Delete Custom Workout    | AC-4                          | TC-CW-003    |
| FR-08          | Start Workout Session    | AC-5                          | TC-WS-001    |
| FR-09          | Complete Workout Session | AC-5                          | TC-WS-002    |
| FR-10          | Workout History Viewing  | AC-6                          | TC-WH-001    |
| FR-11          | View User Profile        | AC-6                          | TC-PROF-001  |
| FR-12          | Admin Add Exercise       | AC-7                          | TC-ADM-001   |
| FR-13          | Admin Edit Exercise      | AC-7                          | TC-ADM-002   |
| FR-14          | Admin Delete Exercise    | AC-7                          | TC-ADM-003   |

|       |                           |      |            |
|-------|---------------------------|------|------------|
| FR-15 | Role-Based Access Control | AC-7 | TC-SEC-001 |
|-------|---------------------------|------|------------|

## 2. Detailed Test Cases and Test Scripts

### TC-AUTH-001 – Successful User Registration

| Field         | Description                                                                                                                                                                                                                                                                               |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Test Case ID  | TC-AUTH-001                                                                                                                                                                                                                                                                               |
| Module        | Authentication                                                                                                                                                                                                                                                                            |
| Objective     | Verify that a new user can register successfully                                                                                                                                                                                                                                          |
| Preconditions | User email is not yet registered                                                                                                                                                                                                                                                          |
| Test Steps    | <ol style="list-style-type: none"> <li>1. Open Register page</li> <li>2. Enter valid firstname</li> <li>3. Enter valid lastname</li> <li>4. Enter valid email</li> <li>5. Enter valid password</li> <li>6. Enter matching confirm password</li> <li>7. Click “Register” button</li> </ol> |

|                  |                                                                                                                                               |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Expected Results | User account is created successfully<br><br>User data stored in database<br><br>JWT token generated<br><br>User redirected to dashboard/login |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|

### TC-AUTH-002 – Successful User Login

| Field         | Description                                                                                        |
|---------------|----------------------------------------------------------------------------------------------------|
| Test Case ID  | TC-AUTH-002                                                                                        |
| Module        | Authentication                                                                                     |
| Objective     | Verify that registered users can log in successfully                                               |
| Preconditions | Existing registered user account                                                                   |
| Test Steps    | 1. Open Login page<br>2. Enter registered email<br>3. Enter correct password<br>4. Click “Sign In” |

|                  |                                                                                                |
|------------------|------------------------------------------------------------------------------------------------|
| Expected Results | User authenticated successfully<br><br>JWT token generated<br><br>User redirected to dashboard |
|------------------|------------------------------------------------------------------------------------------------|

#### TC-EX-001 – View Exercise Library

| Field            | Description                                                                                                                |
|------------------|----------------------------------------------------------------------------------------------------------------------------|
| Test Case ID     | TC-EX-001                                                                                                                  |
| Module           | Exercise Library                                                                                                           |
| Objective        | Verify that exercises are displayed correctly                                                                              |
| Preconditions    | User is logged in                                                                                                          |
| Test Steps       | 1. Login to system<br><br>2. Navigate to Exercise Library page                                                             |
| Expected Results | Exercise list displayed<br><br>Exercise names visible<br><br>Difficulty levels visible<br><br>Target muscle groups visible |

**TC-EX-002 — View Exercise Details**

| Field            | Description                                                                                                                  |
|------------------|------------------------------------------------------------------------------------------------------------------------------|
| Test Case ID     | TC-EX-002                                                                                                                    |
| Module           | Exercise Library                                                                                                             |
| Objective        | Verify that exercise details can be viewed                                                                                   |
| Preconditions    | User logged in and exercises exist                                                                                           |
| Test Steps       | 1. Open Exercise Library<br>2. Select an exercise<br>3. Click “View Details”                                                 |
| Expected Results | Exercise detail modal/page opens<br>Exercise description displayed<br>Difficulty displayed<br>Target muscle groups displayed |

**TC-CW-001 — Create Custom Workout**

| Field            | Description                                                                                                                                                                                                                                   |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Test Case ID     | TC-CW-001                                                                                                                                                                                                                                     |
| Module           | Custom Workout                                                                                                                                                                                                                                |
| Objective        | Verify users can create custom workouts                                                                                                                                                                                                       |
| Preconditions    | User is logged in                                                                                                                                                                                                                             |
| Test Steps       | <ol style="list-style-type: none"> <li>1. Open Custom Workouts page</li> <li>2. Click "Create New"</li> <li>3. Enter workout name</li> <li>4. Select exercises</li> <li>5. Configure repetitions and sets</li> <li>6. Save workout</li> </ol> |
| Expected Results | <p>Workout created successfully</p> <p>Workout stored in database</p> <p>Workout appears in workout list</p>                                                                                                                                  |

### TC-CW-002 – Edit Custom Workout

| Field            | Description                                                                                                                                                                             |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Test Case ID     | TC-CW-002                                                                                                                                                                               |
| Module           | Custom Workout                                                                                                                                                                          |
| Objective        | Verify users can edit custom workouts                                                                                                                                                   |
| Preconditions    | Existing custom workout available                                                                                                                                                       |
| Test Steps       | <ol style="list-style-type: none"><li>1. Open Custom Workout list</li><li>2. Select workout</li><li>3. Click “Edit”</li><li>4. Modify workout details</li><li>5. Save changes</li></ol> |
| Expected Results | <p>Workout updated successfully</p> <p>Updated details displayed immediately</p>                                                                                                        |

### TC-CW-003 — Delete Custom Workout

| Field            | Description                                                                                                                     |
|------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Test Case ID     | TC-CW-003                                                                                                                       |
| Module           | Custom Workout                                                                                                                  |
| Objective        | Verify users can delete custom workouts                                                                                         |
| Preconditions    | Existing custom workout available                                                                                               |
| Test Steps       | <ol style="list-style-type: none"><li>1. Open Custom Workout list</li><li>2. Select workout</li><li>3. Click “Delete”</li></ol> |
| Expected Results | <p>Workout deleted successfully</p> <p>Workout removed from list and database</p>                                               |

**TC-WS-001 – Start Workout Session**

| <b>Field</b>     | <b>Description</b>                                                                    |
|------------------|---------------------------------------------------------------------------------------|
| Test Case ID     | TC-WS-001                                                                             |
| Module           | Workout Session                                                                       |
| Objective        | Verify workout sessions can be started                                                |
| Preconditions    | User logged in and workout exists                                                     |
| Test Steps       | 1. Select predefined/custom workout<br>2. Click “Start Workout”                       |
| Expected Results | Workout session screen opens<br><br>Timer starts<br><br>Exercises displayed correctly |

**TC-WS-002 – Complete Workout Session**

| <b>Field</b>     | <b>Description</b>                                                                                        |
|------------------|-----------------------------------------------------------------------------------------------------------|
| Test Case ID     | TC-WS-002                                                                                                 |
| Module           | Workout Session                                                                                           |
| Objective        | Verify completed workout sessions are recorded                                                            |
| Preconditions    | Workout session already started                                                                           |
| Test Steps       | 1. Complete all exercises<br>2. Click “Finish Workout”                                                    |
| Expected Results | Session saved successfully<br>Completion date recorded<br>Duration recorded<br>Workout appears in history |

**TC-WH-001 – View Workout History**

| Field            | Description                                                                                        |
